Q) Create a counter application page using React and Redux with increment and decrement functionality.

Ans) App.jsx :-

```
import { createSlice, configureStore } from '@reduxjs/toolkit'
import { Provider, useSelector, useDispatch } from 'react-redux'
```

```
const slice = createSlice({
  name: 'counter',
  initialState: { value: 0 },
  reducers: {
    inc: (state) => { state.value++ },
    dec: (state) => { state.value-- }
  }
})
```

```
const store = configureStore({
  reducer: {
    counter: slice.reducer
  }
})
```

```
function Counter() {
  const count = useSelector((state) => state.counter.value)
  const dispatch = useDispatch()

  return (
    <div style = {{ textAlign: 'center', marginTop: '50px' }}>
      <h1> Count: { count} </h1>
      <button onClick = {() => dispatch(slice.actions.inc)}>
        + inc </button>
      <button onClick = {() => dispatch(slice.actions.dec)}>
        - dec </button>
    </div>
  )
}
```

```
function App() {
  return (
    <Provider store = {store}>
      <Counter />
    </Provider>
  )
}

export default App
```
